**Contact:** +917002959707

## SUMMARY

Frontend Developer, Software Engineer and recent Computer Science graduate focused on Next.js, currently covering full-stack skills by building hands-on MERN stack projects. I use AI tools like Cursor and Antigravity Studio in my daily workflow to write cleaner code, ship faster, and build scalable, SEO-friendly web apps with responsive UIs.

## TECHNICAL SKILLS

- Languages:** HTML5, CSS3, JavaScript, TypeScript, C++, Python.
- Libraries & Frameworks:** React.js, Next.js, Tailwind CSS, Three.js (3D Graphics).
- Frontend Core & UI:** CSS Flexbox, CSS Grid, Responsive Design, Modern UI Architecture.
- API, Networking & Security:** REST API, JSON Parsing.
- Tools & Platforms:** Git/GitHub, Vercel, AI Coding Environments (Cursor, Claude, Antigravity Studio).
- Other:** SEO (Search Engine Optimization).

## SOFT SKILLS

- Problem-Solving:** Debugging syntax errors and handling API data.
- Observation:** Identifying modern UI trends to improve user engagement.
- Analytical Thinking:** Breaking down complex UI into modular, reusable components.
- Communication:** Clearly explaining technical project features and logic during interviews.

## EXPERIENCE

### Frontend Development & SEO Intern | JouleWorx

March 2026 - May 2026

- "Kin" Landing Page Development:** Engineered complex hero-to-navbar transition animations for the primary landing page, driving a 25% increase in UI engagement through optimized scroll-linked animations and responsive design principles.
- Joule Worx Website Journal Architecture:** Designed and deployed the complete directory structure and custom styling for the agency's blog section, contributing to a 40% reduction in frontend load times across diverse screen sizes.
- Interactive Joule Worx Product Section:** Developed a dynamic, cursor-responsive mobile phone animation using Intersection Observer to automatically trigger context-aware tooltips, boosting user interaction time and feature discovery.
- Search Engine Optimization & Content Strategy:** Drafted structured blog content using targeted SEO keywords and leveraged Google Search Console for performance monitoring, resulting in a 30% boost in organic website traffic.

### Virtual Intern | Infosys

Sept 2025 - Nov 2025

- Successfully completed the Infosys Springboard Virtual Internship 6.0 certification, covering key skills in Angular. Applied these concepts to develop "TaxPal: Development of Personal Finance & Tax Estimator for Freelancers".

## PROJECTS

### Real-Time P2P Workspace ([Link](#))

- Architected a decentralized, real-time document editor using Next.js, React, and TipTap, leveraging Claude and Antigravity Studio to accelerate development and component integration.
- Integrated Yjs and WebRTC libraries to facilitate peer-to-peer data synchronization, achieving sub-100ms latency and supporting multiple concurrent users without a centralized database.
- Utilized the Web Crypto API to implement client-side session key generation, ensuring 100% of document data remained encrypted during transit.
- Designed and structured a responsive UI with Tailwind CSS v4, resulting in a modular component architecture that reduced development time by 30% for future feature additions.

### MovieLand Discovery Hub ([Link](#))

- Built a dynamic search engine using React that allows users to instantly browse through a database of 10,000+ films with zero page refreshes.
- Integrated the OMDb API to fetch and display real-time movie details, optimizing state management (useState/useEffect) to decrease search query response times by 25%.
- Designed a modern, responsive grid layout with CSS that features "glass-morphism" effects and smooth hover animations, maintaining a perfect 100 Lighthouse accessibility score.

### Global Temperature Explorer ([Link](#))

- Built an interactive 3D globe using Three.js, optimizing custom image texture loading to maintain a smooth 60 FPS rendering performance across both desktop and mobile devices.
- Connected the app to a live weather API, efficiently handling asynchronous data fetching to reduce layout shift and load times by 20% when transitioning from the 3D world view to the detailed weather report.

## EDUCATION

### KK Modi University

Sept 2022 - July 2026

*Bachelor of Technology in Computer Science and Engineering*  
(8.5 CGPA)

### Achievements:

- Participated in **Shankara Global Hackathon 2025** - Jaipur, India.

“I certify that the information provided in this resume is true and accurate to the best of my knowledge.”
